Projects

Food Management System   03/2023 - 06/2023

The Food Management System is a web-based application that helps to manage food in hostels, catering areas, and hotels. The system provides a platform to display extra food available in the hotel or catering area.

Online Property Scanner (Web Scraping)   06/2023 - 09/2023

Online Property Scanner is a web application that enables users to search for properties for sale and real estate by city and locality. Implemented a web scraping mechanism to extract property data from multiple websites and display the results on the website.

ML-Driven Restaurant Inventory Optimization   12/2023 - 04/2024

It is an ML-driven restaurant inventory optimization system. The system uses past sales data and external factors to predict the required raw materials (inventory) for the upcoming weeks, ensuring efficient and proactive inventory management.

Certifications

Programming, Data Structures and Algorithms Using Python - **NPTEL**
